ViTrox Corp may see
highest-ever revenue in 2017

ViTrox Corp Bhd could break its previous revenue records yet again and hit up to RM80mil in Q2 FY17 on strong order backlog, the strong order backlog was mainly from its automated board inspection (ABI), ViTrox' story does not end in 2017 as it continues to venture further into inspection automation of new products.

Big Data Makes Big Waves

Big data got an algorithm that found more relevant results on the web than the search engines of their rivals. The Internet of Things(IoT) is opening vast new data sources, expanding big data's promise to reshape business, technology, and the job of the technologist. Along the way, big data is inspiring new kinds of processor and systems architectures etc.

Commercial big data projects are just as diverse, a scientist of SAS claimed, "They are working with a semiconductor company to help reduce defects in their chip fab process through improved computer vision.
