

World Leading Machine Vision Solutions Provider

TH3000i

The Latest Tray-Based
Vision Solutions

You are familiar with our tray-based vision solutions, the automatic tray to tray 2D, 3D, ball, leadless package and passive component inspection systems for the semiconductor manufacturers. As ViTrox strives to perform continuous improvement on the machines for higher customer satisfaction, we have now brought out a new model under this series- TH3000i.

Apart from the similar machine layout and cutting-edge key technologies, TH3000i offers advantages as follows:

- **High-Speed Tray to Tray Inspection.**
- **High Performance With Ease of Operation.**
- **Automatic Sort-reject Management Capability.**
- **Quick Conversion Time.**
- **Low Maintenance Cost.**

To find out more, you may contact our sales personnel anytime. If you are looking for a more advanced prototype machine to enhance your production throughput, this would be your great choice! We hope to hear from you.

ViTrox Celebrates its 20th Anniversary in 2020

Merry Christmas and Happy New Year to all of you. That rhymes it up! We are jingling our passion and riding our dedication towards the new chapter of our milestone. 2020 marks our 20th years of service as the leading machine vision solution provider.

Looking back to how it all began, ViTrox has grown from a humble trio to a core leadership team, and now a committed force that caters for the worldwide's services. We want to thank all our ViTroxians, investors, suppliers, vendors, and customers for your tremendous support throughout this eventful journey. We couldn't make it this far without the contributions you have given us since the beginning.

Your feedback is important to help us improving our service
