

World Leading Machine Vision Solutions Provider

Wi8i  
Wafer Vision Inspection Handler

## What Does Wi8i Offer To You?

Last year, we've launched Wi8i, the wafer inspection handler that provides an advanced solution for **2D surface defect inspections and measurements**. This inspection system equipped with the Multiple handling mechanisms to support different wafer forms including raw wafer, hoop ring, and framed wafer range from 100mm(4") to 200mm (8").

Now that you have known the purpose of Wi8i, but do you know that it could benefit you in several extraordinary ways? The capabilities of this machine are as listed below:

- Replace conventional human visual inspection.
- Provide inspection customization to fit future inspection needs.
- Provide repeatability and reproducibility inspection results.
- Customize inspection algorithm.
- Maximize production throughput and yield.

Since you are well aware of the perks of having Wi8i now, so what are you still waiting for? If you are the right manufacturer, congratulations, we've got a good deal for you. Contact our sales personnel for more details now!

## NEPCON Thailand

Last week, we participated in one of the world-renowned events, NEPCON Thailand on 19th to 22nd June 2019 at BITEC, Bangkok Thailand. This 4-day exhibition was to display technologies of Assembly, Measurement and Testing Technologies for the Electronics Manufacturing industry.

ViTrox was honoured to showcase **V9i Conformal Coating Inspection (CCI)**, our latest Automated Robotic Vision (ARV) solution to the visitors. V9i, or also known as Cobot, enables the close collaboration between human and the robot to run conformal coating inspection on electronic devices.

As the exhibition attracts E&E industrialists, we're glad that the machine was set at the right channel and had received a warm response from the crowd. Once again, thank you all for dropping by. We hope to see you again next year!
