

World Leading Machine Vision Solutions Provider

Lightning programming, or also known as inline OLP(Offline Programming) in **Advanced X-Ray Inspection** field, is a feature that allows the improvement of machine utilization in the production line. With the usage of lightning programming, users are able to run the software while fine-tuning other recipes at a time under one subtype.

This program is built in our **Advanced 3D X-Ray Inspection (AXI)** series with the new interface design- “Modify Subtype” UI, as a part of the compelling features. It is useful on several occasions such as fine-tuning image collection, precision tuning image collection, production, and CD&A.

By acquiring the AXI series with lightning programming’s software feature, the production time will be improved up to 50%.

Semicon Southeast Asia, Thanks for Dropping By!

Three weeks ago, you were a part of the grand tradeshow for the electronics industry in Southeast Asia. We can't thank you more for attending Semicon SEA 2019 on 7th to 9th May 2019 at MITEC, Kuala Lumpur.

Apart from showcasing machines from all four business units, we were beyond thrilled to display **V510i Optimus 3D AOI** and **V-ONE** in Smart Manufacturing Pavilion during the exhibition. We even had Gary Leong, our Industry 4.0 and Ecosystem Development Director as one of the Tech Arena Speaker on 7th May 2019 and 8th May 2019 at Tech Arena Stage. If you attended his speech, we bet you have learned the ways V-ONE builds a healthy ecosystem in the ever challenging business landscape today.

Once again, we sincerely appreciate your support and we hope to do it better next year.

Your feedback is important to help us improving our service

ViTrox co-hosted a 3D AOI Roadshow at SMT Engineering Office, Mexico on 30th April 2019 to 3rd May 2019, from 9am-5pm. The 4-day program was held in a one-to-one consultation mode for each slot. During the event, the AOI Specialists showcased **V510i Optimus 3D AOI**, the next generation of Advanced 3D Optical Inspection System (AOI) that offers the powerful 3D inspection capabilities for the SMT line, and **V-ONE**, a

highly customizable open platform which offers data-driven decisions in the manufacturing process to the visitors. Throughout the roadshow, ViTrox received a warm response from the Mexican visitors.
