

World Leading Machine Vision Solutions Provider

V-ONE Review: Story From ASM Assembly System

As the user of AXI and AOI models, we believe you are familiar with **V-ONE**, our software-based industrial 4.0 solution that integrates machine to machine (M2M) communications and provides real-time performance monitoring to optimize the manufacturing process.

The configurable and robust features of V-ONE stands out from other solution providers in the market as it is customizable and suited to a wide range of customers' needs. Users are allowed to connect this software-based solution to inspection machines such as AOI and AXI, as well as other SMT equipments to enhance the data-driven process and maximize production throughput.

Our collaboration partner, **ASM**, one of the leading pick and place solution providers in the world, is satisfied with how V-ONE correlates with their solutions to enhance the total production yield, quality, and shorten the NPI lead time. We are beyond thrilled to have Dr. Thomas Marktscheffel, the Product Manager of ASM Assembly Systems with us in the latest testimonial video. Click the link below for a full-length video to understand further about the collaboration between **ViTrox** and ASM towards the success of Industry 4.0.

Your feedback is important to help us improve our service

Penang International Science Fair 2019

We proudly announce the success of our involvement at Penang International Science Fair 2019 (PISF). Held from 2nd to 3rd November 2019 at SPICE Arena, Penang, PISF is a science program organized by Penang Science Cluster to stimulate children's interest in Science, Technology, Engineering and Mathematics (STEM).

This year, ViTrox doesn't only come with a few robotic activities such as V-EM Train, V-Chicken Run, and V-Mini Robot. Still, they showcased V-Farm Automation, a modern vertical farming system that enhances agricultural yield and minimizes the usage of resources to educate the younger generation on the importance of agriculture to the mother earth.

Contrary to the past, the workshops by ViTrox for this year's PISF was unprecedented as they promote the advantages of both worlds: Technologies and Agriculture. We would also like to thank every attendee who dropped by our booth to show tremendous support during the two-day event. We hope to see you all again next year with a more exciting programme.
